

SPECIAL ENLIGHTENMENT WORK- SHOP SERIES

Neurodiversity: Designing Inclusive Learning
Environments

TUESDAY, APRIL 25, 2023
12-1 PM (MICROSOFT TEAMS)

Neurodiversity is a term that encompasses a wide range of differences in the way our brains work. It includes conditions such as autism, ADHD, dyslexia, and Tourette syndrome. While these differences can present challenges, they also bring unique strengths and perspectives to the workplace. This workshop will explore how to create an inclusive learning environment that supports neurodiversity and allows everyone to thrive.
