Executive Summary	
Part 1: Introduction	
Part 2: Methodology	 \$

Part 1 Introduction

Thisepot desibes findings about v pesof bance aba teament pogams axilable to some offenders in he ciminal jice sym. Boh he Alaka CottSsym (heapetic coth ¹ and he Depatement of Coections (bance aba teament for incarcented person) ² offered pogams in kich pat icipant we chosen hogh a combination of winary action on he pat of he paticipant and seening for stross chance it cosh are to be teament pogams in the paticipant and seening for stross opening ince 1999; he DOC bance a be teament pogams ince mid-2009.

At he eques of he Cim inal Jace Woking Gop, h e Alaka Julicial Concil (Concil) and he Inste of Social and Econom ic Research at he University of Alaka Anchonge (ISER) eisewd earstand econic ton nesforpaticipants after heycompleted Anchorou 7.98 to 2743 Twt Second, elatelysnall data e see axilable forsty The heapetic costshare enough data abot 322 of hem to analy for hiseport The DOC basince absi programsev e news lite long-tem information as axilable forme parcipants

Thid, means oher han eact and econicions cold be a propriation of the mean he effective eact and he bock bance abs programs Forexample, becans addictons are chonic, elapsing disass increasingly longer times between elapses and learning series to the elapses are often sed to mean effective eact abs teament Increased good behavior in instanal strings is a strict str

Part 2 Methodology

The Jdicial Concil and ISER eiewd data poided by e Departmentof Coectons abotpatcipants in DOC initional bs ance abs pogamsding FY 2010, and dat poided by Alaka CotSym abotpatcipants in heapetic cotform Janay 2000 hogh Jne 2010. Data abotoffendet piorcim inal hitsies earstand econictons and eleas dates we obtained from he Depa B. Department of Corrections data ⁹

The dyinclded 326 patcipan	sho had been eleasd	foratleatone gar
Of he 326, 199 had an udeling fe	lonya nd 127 had an	ndehjng mislemeanor

⁹ The Department of Corectons also conductd an inten al styof he patcipant in it bance aba pogams ing diffeentmehodsand paamees(Alaka Depathentof Coecions Substance Abuse Treatment Services Status Report, Janay 2012. Asilable for he Alaka Department of Coectons. The DOC sty looked athovofen eleased parcipansho had completed a pogam we emanded back to DOC codyfor anyeaon ding a period aftereleas, he lengh of baich aried depending on he eleas date. All FY 2011 patcipanthad been otof DOC ctadyforatleathee monhsteen he analissuspeformed in Octoberof 2011, bunctall had been outforatleast a gar DOC so snable to tack patcipantsbetten pogams Some patcipant did not complete a pogam in a pecific in ition, budid complete a compatible pogam in a diffeent inition. Becau of he inability tack between pogams DOC onlylooked at patcipant ho completed a pogam.

DOC deva compaison gop for offendes in he geneal DOC poplaton ho had not patcipated in any bance abs pogams had sed at least formonhis a DOC inston, and ho we eleased ding he ame fisal garashe gop of patcipants hom hever being compared. The slecter and patally voltagener of patcipation in boh peoof pogamscold affect he ones

Depie differencesin mehodologiesand means boh sliesfond hatpeople ko patripat in bance aba pogamsær leslikelyt recidiær. There als ver differencesin howDOC acked patripans and heydid nothær demographic, prorecod, orndeling pe of offens data aboteach patripant The slies ad differentmehodsto eiestre data. The elscannotbe directycompared.

Part 3 Data Issues

Alakašciminal jāce tym hasmade an ing pacices and pogams based on eidence h jislicions Becats Alakašciemāncesa howhathe ame pogamsae achieing he s The onlymeansof accomplibing hisisto compile Alakašciminal jāce tym hasmade an effotoærhe pats at heyhaæ been seesti in oher nd poplatonsae niqu, policynakessanto ceessin histae hatheydid elstaee. and analæ data abothe Alaka pogams

Like oherates Alaka hasepseienced manychallengesith its collecton of data. Imposed data collecton its enhance he sale of fate exalations Areas in need of imposementate identified below

A. Recording data and r ecording it consistently

Information not recorded: Some of he infomation hat wild be mot still for exlating pogams is new recorded. This includes infomation about he scioeconomic tasof parcipants and infomation abotheir bance abs and phycal ormental health iss . Examples of infomation hat might not be ecoded in a cant file for a pogam parcipant wild be hisy of bance abs or mental health poblems and parassementand teament infomation.

Information only in paper files, and not consistent: Ofen, infomation abottbance aba and phical ormental health ins isecoded onlyin paperfiles Those paper files may or may not be acceible hogh one of he ciminal jice agencies Reteing infomaton fom paperfilesist me-consning atbest and made difficitby m of noesmade byindiidalsho maybe he facthathe data are often in he fo ecoding he patcipant pr oblemsing nique persectors hohand any of desibing information, or two may eco **d** only patal infomation. Additional infomation hatisofen onlyin paperfile smayinclde dates and otomesof pogam patcipaton events hashearings

Missing information in electronic sources: Information hat is in heory ecoded in an electronic databas maybe mising much of h e tme. One example of his is APSIN ID number a number is d to all persons ever area (i nclding jurni les). It is constantly ecoded in he Department of Public Safety APSIN databas, but often is not ecoded by oheragencies with the nee is a field in he agency databas for it

Information within an agency database is inconsistently recorded: When he infomation isecoded in a ingle agencivatabae, it is often ecoded in consentyfom one entto he net Thus a ingl e pesn in anyone of he majo rciminal jice databas mayhave hee orford iffeentientions of hisorhername in a ingle database -it a middle initial, it he fit and lat names eved, it one of he names kighty misselled, its orithota fixsh as juior'Thatame peon alo mayhav seal ariatonson he dat of bih, and oherpoisble iden ifing nmberopiecesof data.

Inconsistent formatting of information: infomation be ecoded in a cetain fomat

Mosdatabasseqie hat a name orpiece of Forexample, l'asname, fisname, middle The ciminal jice agencies have ageed to the bepatient of Public Safety APSIN ID numberin all databases Alhogh he number in all ciminal cassfiled in he alaka CottSym, it ill be some time before all agencies are able to obt ain and ecord he number The Depatient of Public Safety is oking on a type hat ill allowahoized to the number of the corect APSIN ID number

To be able to exclute eidence-based pogams, agencies ill need to ensume hat contactors forteatment pogams or oher people compiling data elated to pogams also se identifying information hat is boh consistentive in the agency and consistentiate he sendards being sed hoghouthe ciminal jice sy entering name, date of bih, cotrcase numbers eque se of APSIN ID numbers by all persons eidence-based pogams

Part 4 Findings

The findings epoted belowcompare earts and econiction ates for pogam patcipants (gadates and non-gadates) to earts and econicito n ates for comparison offenders AppendixA illutes amont of time elapsed for pogam patcipants and he comparison gops null earts or econiction. The comparison of both he earts and he econic ton soccured by the end of isomorphis
