

Dr. Zhixin Miao is currently an Assistant Professor in the Department of Electrical Engineering, University of South Florida. Dr. Miao received his B.S. degree in Electrical Engineering from Huazhong University of Science and Technology (1992). He obtained his M.S. degree in Electrical Engineering from Nanjing Automation Research Institute (1997). He received his Ph.D. degree in Electrical Engineering from West Virginia University in 2002.

Dr. Miao worked with the relay department in Nanjing Automation Research Institute from 1992-1999 and with the planning department in Midwest Independent Transmission System Operator from 2002-2009.

Research Interests

His research interests include smart grid automation, electric power system modeling and simulation, microgrid technologies to integrate renewable energy and energy storage, and power market.
